DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to EMI shielding for a computer, classified in class 361, subclass 818.
- II. Claims 6, drawn to a door latch for a computer, classified in class 361, subclass 760.
- III. Claims 7-36 drawn to a computer case classified in class 361, subclass 752.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the computer case can be made with a different emi structure such as overlapping seams and the door can use a snap type latch. Each subcombination has separate utility such as emi shielding for pc card and a latch design for doors other than those used on computer housings.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
